FELLOW AMATEUR:

We here at MOTOROLA are deeply interested in amateur radio and amateur radio equipment. While a great number of our staff are hams or have been hams, we still need a better picture of what hams want in the way of equipment.

Attached is a form which you may fill out if you wish and tell us what you want in the way of amateur equipment. If we haven't asked enough questions or they aren't complete enough, give us any other comment you might care to make.

Paint us a picture of your dream transmitter or receiver. It will help in designing equipment to be offered for amateur use; equipment which will enable you to enjoy your hobby as fully as possible.

Very truly yours,

GALVIN MFG. CORPORATION
